Interest on the Amount Due will be charged as below:
Daily Interest = Outstanding Amount* (3.99%*12 months)/365
*Total Due includes outstanding amount, new purchase, interest charges (interest calculation illustrated above), and applicable Goods & Services Taxes on interest. Example cited is for illustration purpose only. Actual finance Charges / deferred finance charges would vary as per APR/finance charges offered to the customer. Thus, the total interest charged (Finance Charges + Deferred Interest Charges) will be: ` 789.69. If the Card member has not paid the previous month's outstanding balance in full, all the future transactions will bear interest from the day of transaction and the complete outstanding balance will continue to accrue interest on a daily basis. Service taxes will be levied at the applicable rate on the interest amount.

Important: Paying only the Minimum Amount Due every month would result in the repayment stretching over a long period with consequent interest payment on your outstanding balance.
